Appendix I: Declaration on Use of GAI (Generative Artificial Intelligence) Assistance in relation to Assignment/Project (to be submitted individually even for group projects)

I ERICA YU (student name),
EYU006@e.ntu.edu.sg (NTU email) honestly and sincerely make the following declaration in relation to the following course submission:

1. Name of course: OBJECT ORIENTED DES & PROG
2. Course Code: CT2003
3. Instructor: LI FANG
4. Title of Assignment/Project Submission: RESTAURANT RUSH GROUP 6

In relation to the foregoing I hereby declare that, fully and properly in accordance with the Assignment/Project Instructions I have (check where appropriate):

i. Used GAI as permitted to assist in generating key ideas only. ☒
ii. Used GAI as permitted to assist in generating a first text only. ☒

And/or

iii. Used GAI to refine syntax and grammar for correct language submission only. ☒

Or

iv. As it is not permitted: Not used GAI assistance in any way in the development or generation of this assignment or project. ☐

I also declare that I have :

a. Fully and honestly submitted the digital paper trail required under the assignment/project instructions; and that
b. Wherever GAI assistance has been employed in the submission in word or paraphrase or inclusion of a significant idea or fact suggested by the GAI assistant, I have acknowledged this by a footnote; and that,
c. Apart from the foregoing notices, the submission is wholly my own work.

(Optional) Sample Reflection Questions:

In 150 words or less, briefly state up to 5 key ideas that you formulated that the GAI tools alone could not have generated.

1. Prioritised consistency between the final Java implementation, UML diagram and report.
2. Review customer-related functionality and Happy Hour against the assignment requirements.
3. Develop presentation examples to explain VIP customer and Happy Hour pricing using the actual implementation

Identify the key facts generated by the GAI tools and briefly describe how you have verified them.

I used generative AI for coding assistance, debugging, technical explanations and documentation.
I verified the outputs by examining the Java source code, comparing Git versions, running automated tests and gameplay scenarios, and checked console outputs against expected results.
Where discrepancies were identified, I revised the documentation or implementation.
